

Logistics, Progress, Borderless.

YASUDA LOGISTICS CORPORATION

Logistics, Progress, Borderless.

Management Message

Since its founding in 1919, the Yasuda Logistics Corporation has grown its logistics business in scope from the Tokyo area to encompass the whole of Japan, and our logistics network, while still Asia-focused, now extends all over the world as we strive to better meet the needs of our customers.

We also directed our energy towards the real estate business early on, continuing to work towards our dream of a wealthier society through the activities of both businesses, a dream that is coming to fruition today.

Now, the domestic and international environment in which the Yasuda Logistics Group operates is facing a new period of transition. Relying on our corporate philosophy of “trust, creation and challenge” and inspired by our new corporate slogan of “Logistics, Progress, Borderless”, we will anticipate and identify the key changes amid the surging progress of the coming era and keep rising to the challenges offered by new business sectors and the latest technologies. In this way, we will create added value and build a corporate group that our customers can trust to exceed their highest expectations.

Yasuda Logistics Corporation
Kazunari Ogawa, President & CEO

Corporate Slogan

Logistics, Progress, Borderless.

Long-term Vision for 2030

“Through a fusion of the world-renowned YASDA brand and innovative technology, our goal is to become a group that surpasses the expectations of all our stakeholders”

Overview of Medium-term Management Plan

To continue making progress under "Long-term Vision for 2030", which outlines our aims for the 2030, the Yasuda Logistics Group formulated another three-year medium-term management plan covering fiscal years 2025 to 2027, which aims to provide "YASDA Value" that surpasses the expectations of society and our customers by evolving our cutting-edge technology, diverse human resources, and domestic and international network as the collective strength of the Group. Based on this plan, we will strive to further enhance corporate value by strengthening the profitability of our logistics and real estate businesses, promoting sustainability-focused management, and implementing capital policies such as reducing policy shareholdings and strengthening shareholder returns.

YASDA Value

A value shared by all Yasuda Logistics Group companies as they listen and respond sincerely to customer feedback

Basic Policy	We aim to provide "YASDA Value" that surpasses the expectations of society and our customers by evolving our cutting-edge technology, diverse human resources, and domestic and international network as the collective strength of the Yasuda Logistics Group.		
Basic Strategy	Logistics Business	Real Estate Business	Management Infrastructure
	- Expand networks through group collaboration - Provide high-quality, value-added logistics services that address latent needs - Promote efficiency and rationalization	- Enhance value through the maintenance and redevelopment of real estate holdings - Offer real estate solutions based on our expertise	- Increase productivity - Promote sustainability-focused management - Strengthen group governance - Implement a capital policy that enables sustainable growth, maintains financial soundness, and enhances shareholder returns
Consolidated Numerical Targets Fiscal Year Ending March 2028	Operating revenue	Operating profit	ROE
	¥82.0 billion	¥4.5 billion	5.5% or more

Logistics Business

Domestic Logistics

Using domestic logistics centers established in convenient locations around Japan, we deliver batch logistics services optimized to our customers' requirements.

Using our Japan-wide logistics facilities and our transportation and delivery network, we provide a complete range of logistics services catering to the diverse needs of our customers. The combinations of functions on offer range from storage and warehousing through to overland transportation, international goods handling and logistics leasing. Our warehouses and logistics centers offer storage environments and efficient layouts that can be optimized for the characteristics of the customer's products, enabling us to meet specific requirements such as temperature-controlled warehouses and warehousing for hazardous materials. Many years of experience in logistics and specially trained staff mean that we can also deal with detailed tasks such as applying labels, assembling product sets and packaging products for shipping. We are in the process of building our own integrated transportation and delivery network in areas such as the Greater Tokyo and Kansai areas, utilizing major transportation routes between the Kanto, Kansai and Kyushu regions.

The Yasuda Logistics Group network supports domestic logistics

IT Equipment Logistics

We are a one-stop provider of logistics services related to IT equipment.

Do you find your company having to go through the trouble of contacting multiple vendors to handle the setting of your IT equipment, domestic shipments, and disposal such as device collection and data erasure? Our IT equipment logistics service, which handles the highest number of financial devices in the industry, provides one-stop solutions such as storage, equipment logistics work, shipping, installation, collection, and disposal. Let us handle services related to IT devices, from customization of PCs, tablets, or smartphones to relocation of large service products and deletion of data from collected devices for disposal.

Logistics Services

We provide high-quality and comprehensive logistics services inside Japan.

We provide high-quality and comprehensive logistics services in side Japan through flexible thinking and creativity beyond what you would normally find in the logistics industry.

Medical Logistics

Our experienced staff of medical professionals and complete lineup of equipment respond to the various logistics needs in pharmaceuticals and medical devices.

We handle everything from prescription and non-prescription drugs through to chemical reagents and healthcare devices. We have warehouses and storage environments optimized for medical supplies in the Kanto, Kansai and Kyushu areas, and have devised a high-quality working regime with dedicated medical staff, including supervising pharmacists, to deliver products to wholesalers and treatment facilities throughout Japan. We have many years of experience in the handling of medical devices, reagents, diagnostic agents, and the like. We are proud of being one of the most experienced companies in the industry in the field of orthopedic surgery, which requires specialist knowledge and technology, and in the fields of diagnostic agents and testing equipment, which involve sophisticated equipment requirements and require strict management. In addition to the Medical Device Manufacturer, Retail/ Rental License of Specially Controlled Medical Device licenses, we are the first in the warehousing industry to have Medical Device Repair licenses in all categories. Therefore, one of our major strengths is our ability to provide one-stop solutions from shipping and receiving of medical equipment to maintenance, cleaning, and repairs.

Document Storage and Relocation

We can meet the most detailed requirements for office space, including safe and secure document storage, searching, management and relocation.

We offer a one-stop response to customers' office-related requests relating to document storage and relocation. Our document management services will store documents and other media in special rooms that feature excellent resistance to earthquakes. We also provide round-the-clock security to ensure that there is no risk to confidentiality. Customers can rely on us for a complete range of document-related services, ranging from filing stored documents to digitizing the documents, searching for and distributing information and document disposal. This helps customers to achieve more efficient document management and to reduce their office space.

Logistics Business

International Logistics

We provide international transportation services through our global network centered in Asia.

With the ongoing globalization of business, we at Yasuda Logistics Group have leveraged our unique global network centered around Asia to support the international logistics and foreign expansion of our customers. We do this by providing international shipping originating from Japan, third-country transport, and the relevant customs clearance work. We are also extensively experienced with apparel shipping using hanger containers, large cargo shipping of large machinery, steel, and construction materials, and shipping of liquids utilizing tank containers. Let us take care of your sales logistics for overseas markets, with shipping inside Japan as well as overseas shipping and the relevant customs clearance work.

Logistics Services

Expanding comprehensive logistics centered on Asia to the world.

We support the foreign expansion of our customers through third-country international shipping and the relevant customs clearance work.

Introduction of Services

International marine shipping

We provide a variety of international shipping services appropriate for the characteristics of the cargo of our customers.

- Apparel shipping
- Liquid shipping, etc.

Shipping of steel materials

We also handle all work involved in the shipping of steel used in the construction of buildings, such as collection from overseas factories, loading into bulk carrier ships, marine shipping, unloading at Japanese harbors, and delivery to construction work sites.

Third-country transport

Through our overseas offices in China, Hong Kong, Vietnam, Indonesia, Singapore, and India and our network of dedicated overseas agencies, we provide third-country transport services (logistics that does not go through Japan).

International air shipping

Through our mixed cargo network, we provide prompt and optimal air shipping services. In cooperation with one of our Group companies, Fuyo Air Cargo Co., Ltd., we provide customs clearance services and air shipping services centered around Narita Airport and Kansai International Airport.

Customs clearance work

We leverage our knowledge and experience accumulated over many years to provide appropriate advice on customs clearance work.

Customs clearance work
AEO (Authorized Customs Broker)

Overseas logistics services

Let us handle your overseas customs clearance, storage, and shipping work.

Real Estate Business

We perform development according to customer needs, primarily in the Tokyo and Yokohama regions, and provide comfortable spaces, such as office buildings and residential buildings.

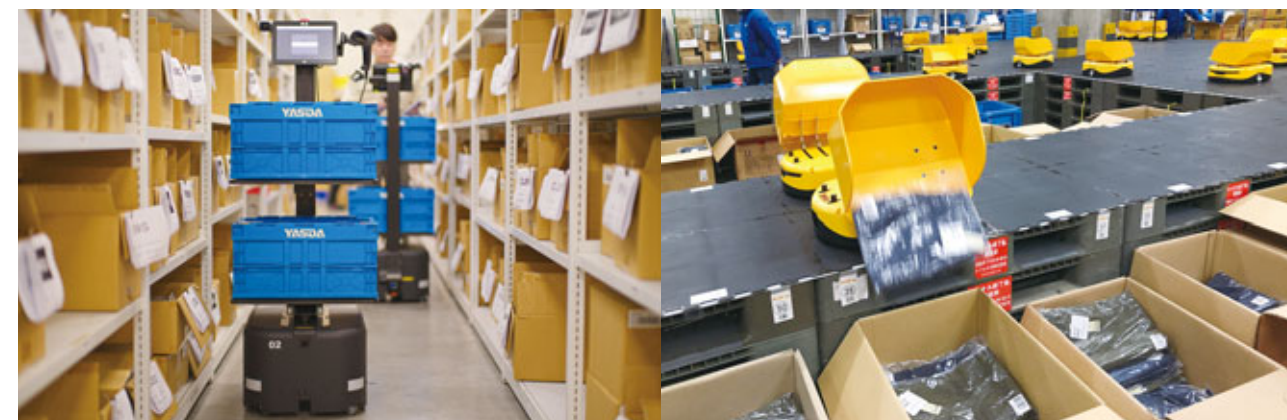

As well as our logistics business, we are actively expanding into the real estate business through services such as development, leasing and building maintenance. As cities grow and urbanization progresses, we are redeveloping our logistics facilities as office buildings or multi-purpose buildings, offering customers spaces that suit their requirements. We are focusing our efforts on creating safe and secure spaces that are built or retrofitted to be quake-proof (seismically isolated), and we are using features such as LED lighting to minimize the environmental impact of our buildings. We are developing office and condominium buildings mainly in Tokyo and Yokohama, and we redevelop real estate when necessary, intending to maintain harmony with the surrounding urban environment.

DX

We will bring transformative changes of business models and quality improvements through using new technologies and upgrading information systems.

In order to flexibly respond to changes of the customer's needs and social environment such as decline in the labor force population in Japan, we explore ways forward towards realization of sustainable logistics service provision in elements of the social infrastructure and creation of new solutions for business issues of our customers through a fusion of the know-how cultivated since our founding, advanced information systems and new technologies such as AI and robotics.

Sustainability

We promote sustainability-focused management to solve both global environmental and social issues while achieving sustained business development.
